

Blue Moon Tank instructions

step 1

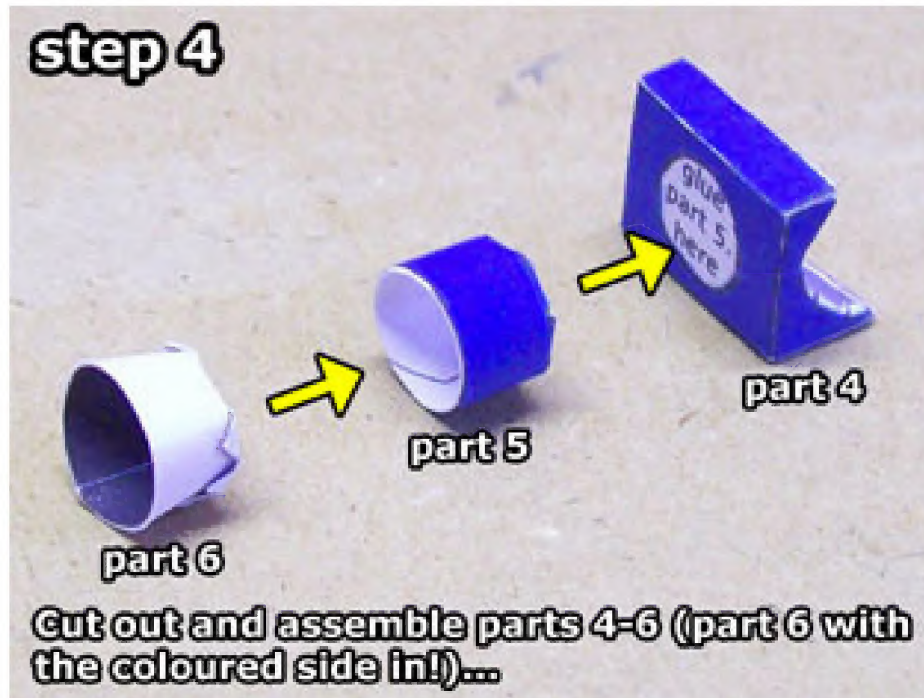

step 2

step 3

step 4

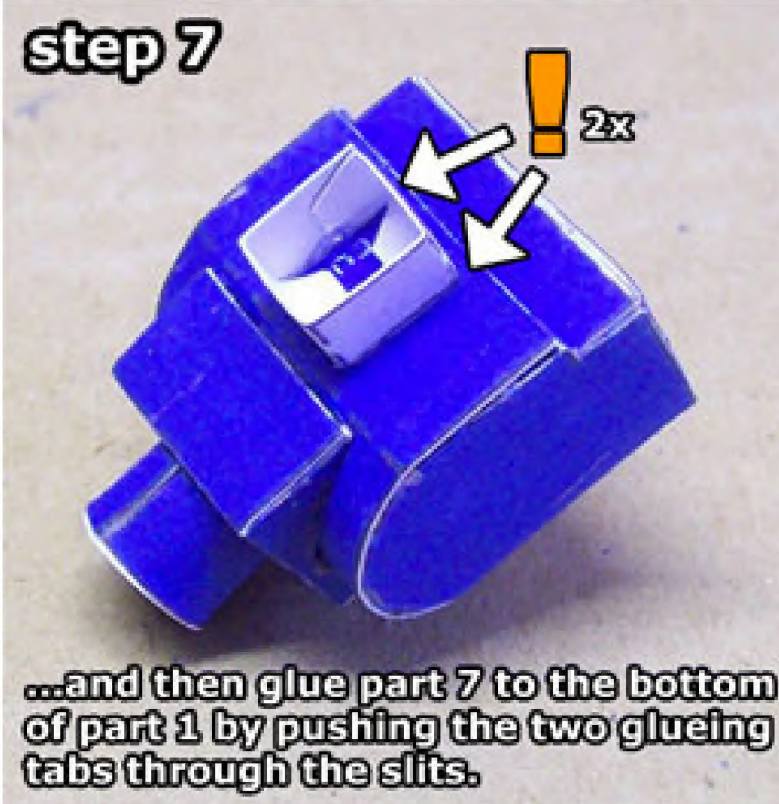

step 5

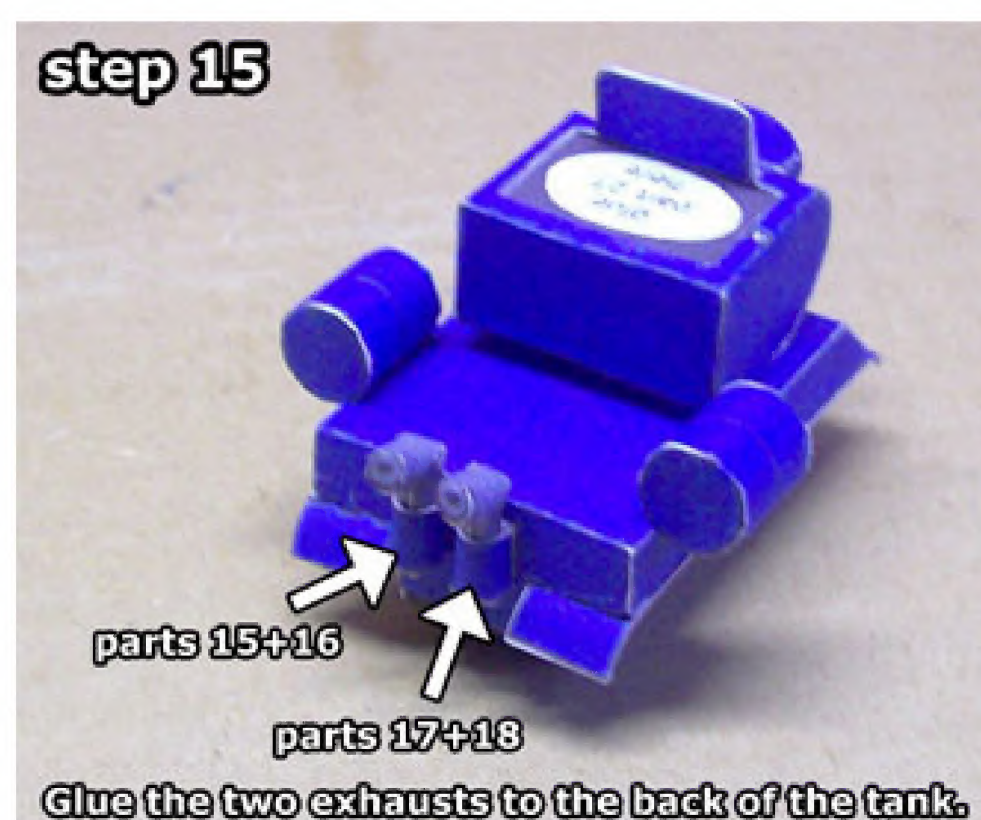

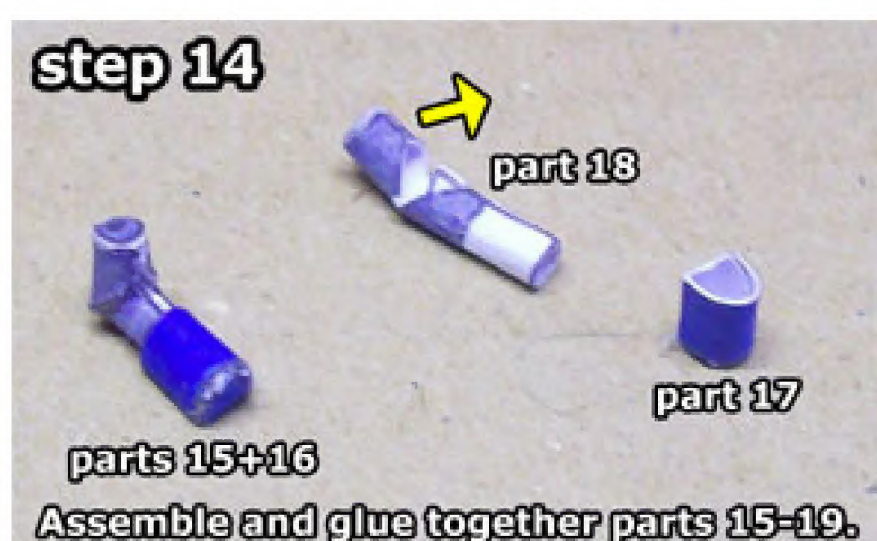

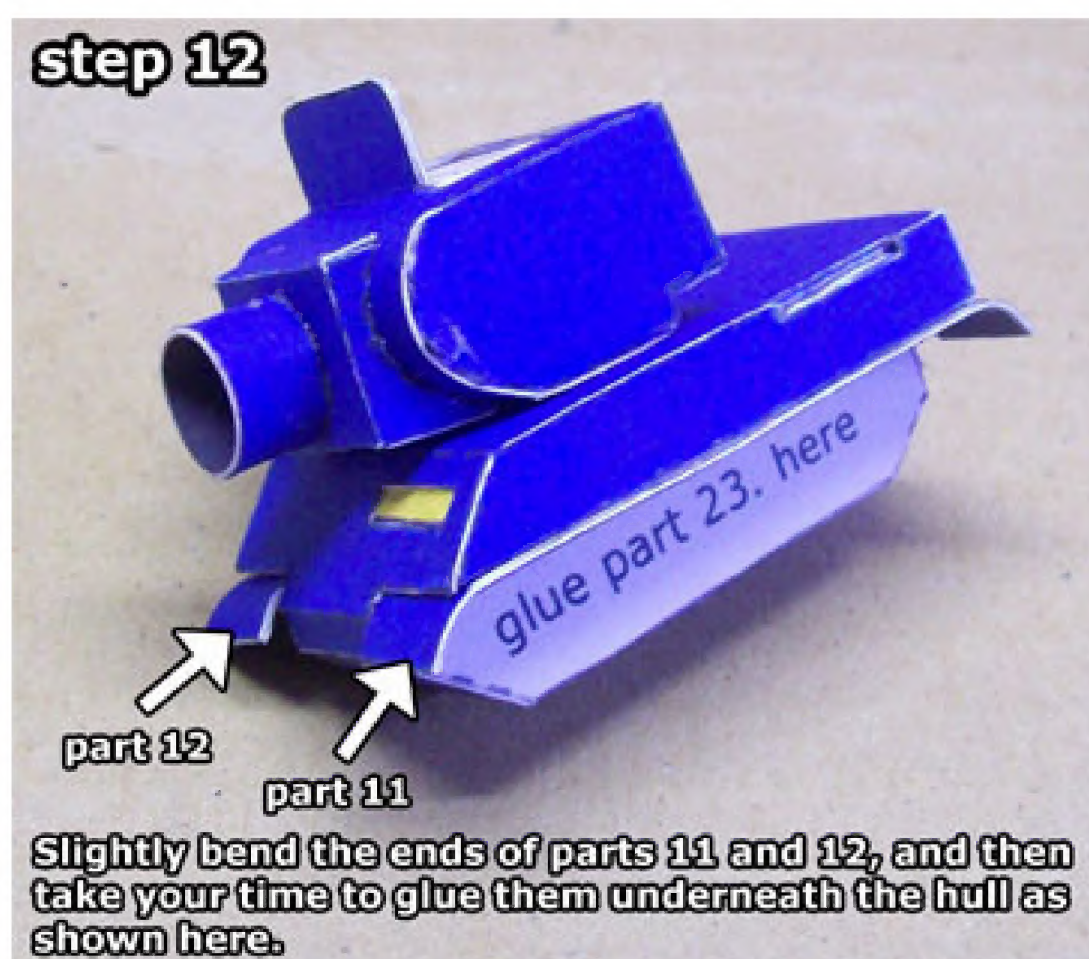

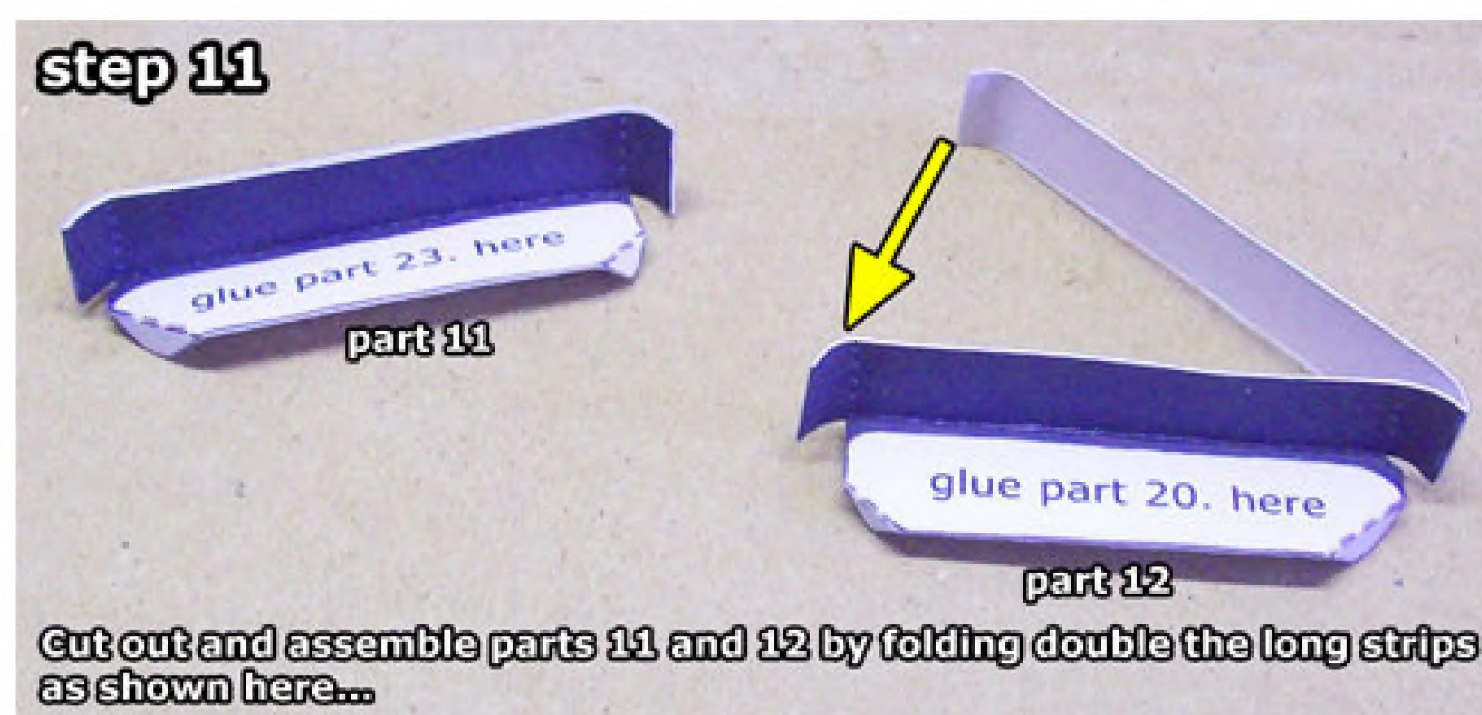

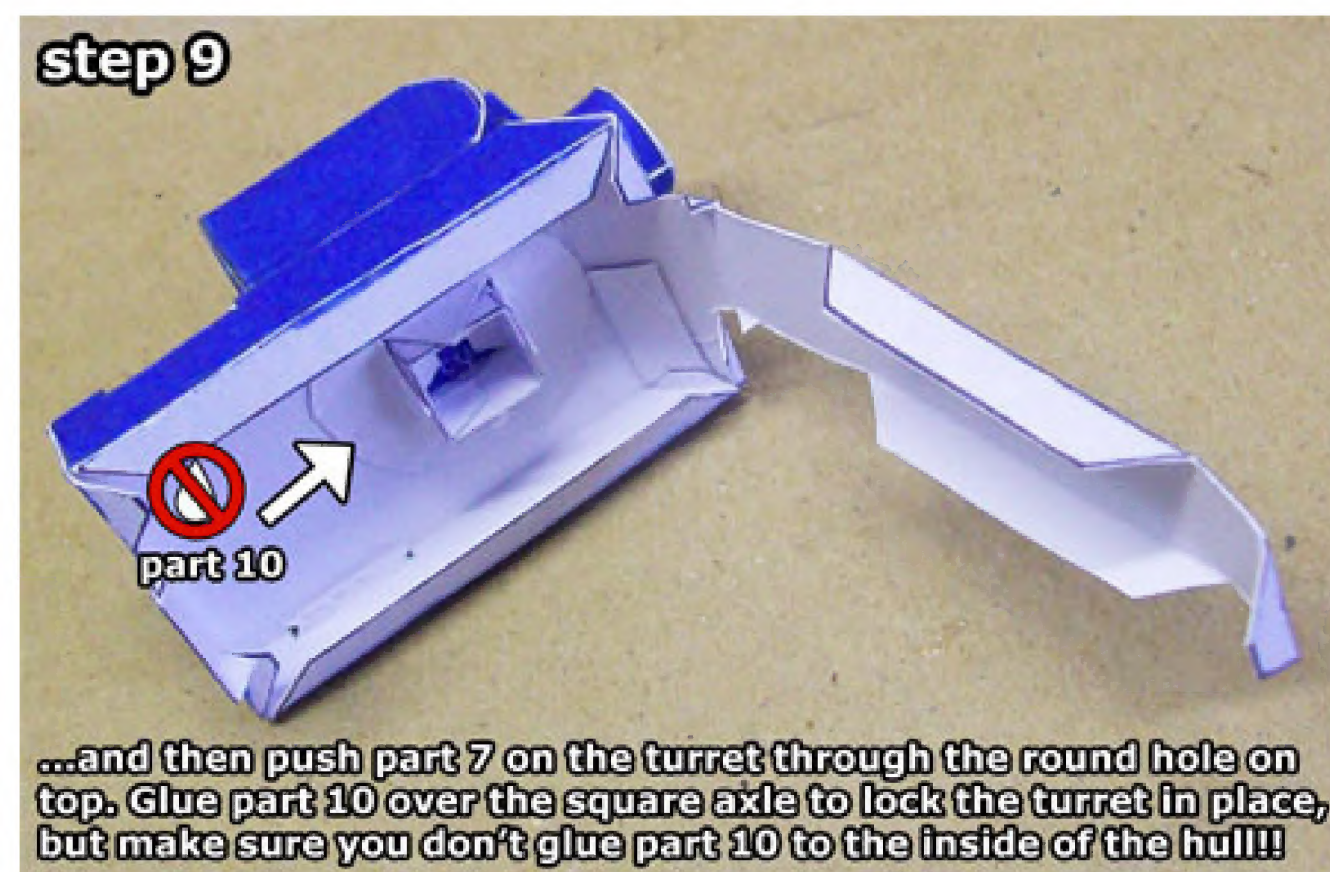

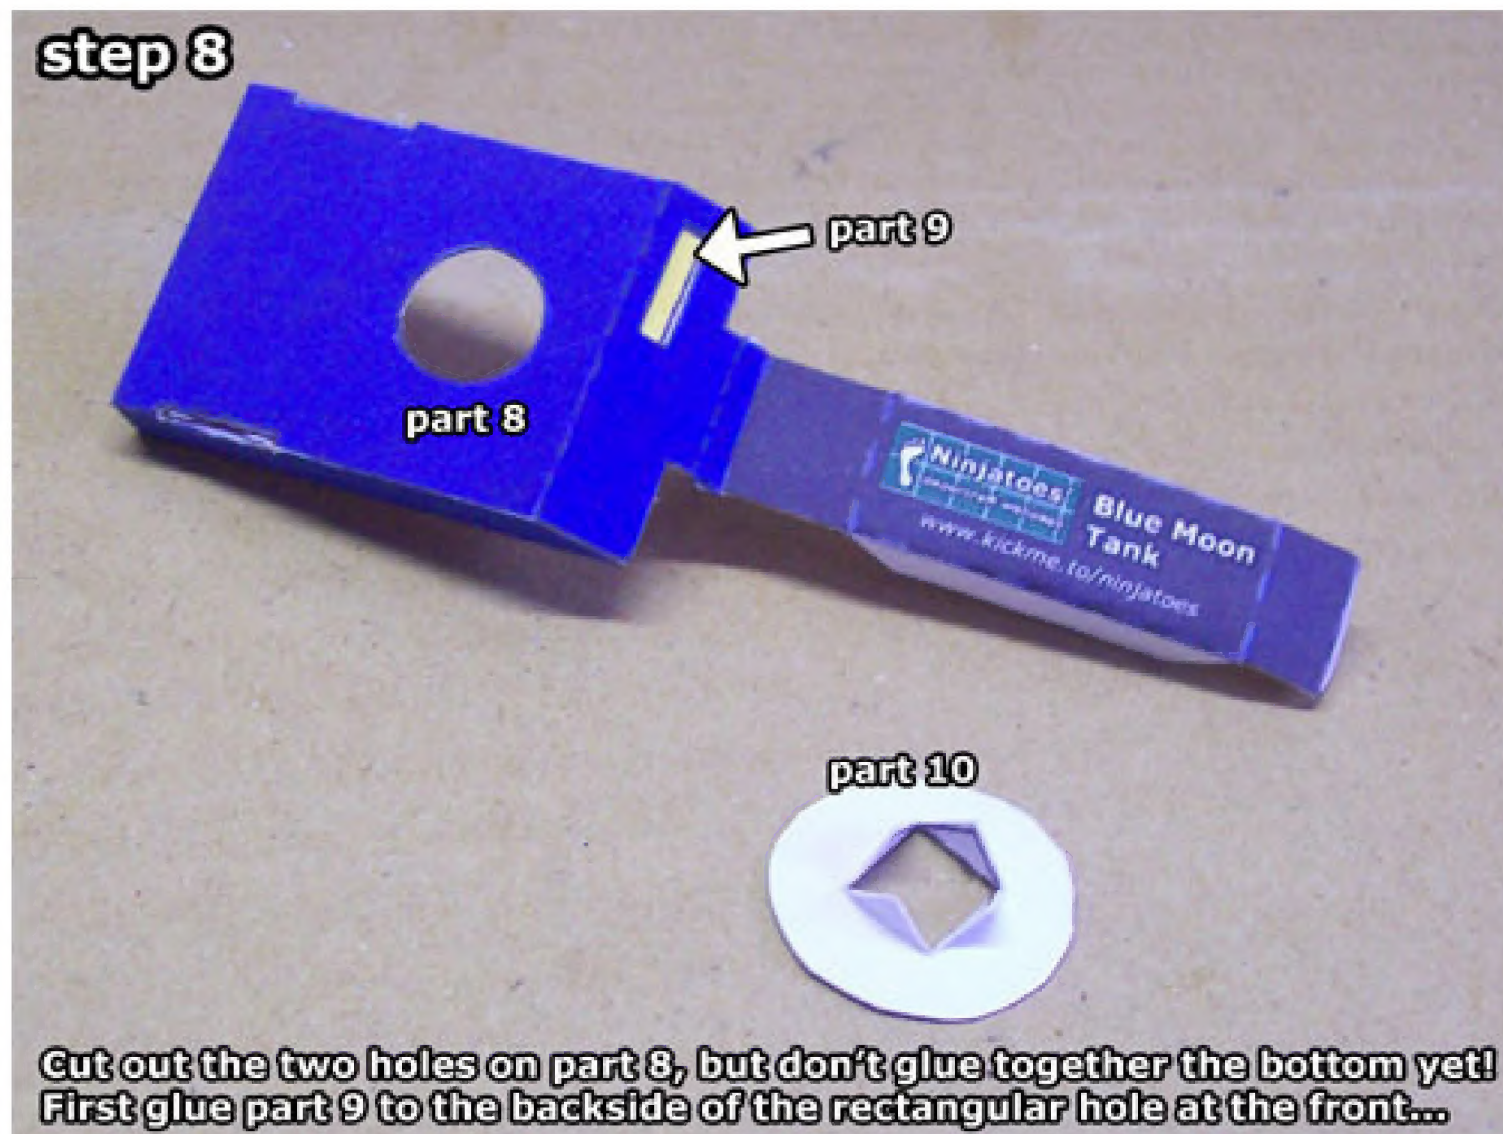

step 6

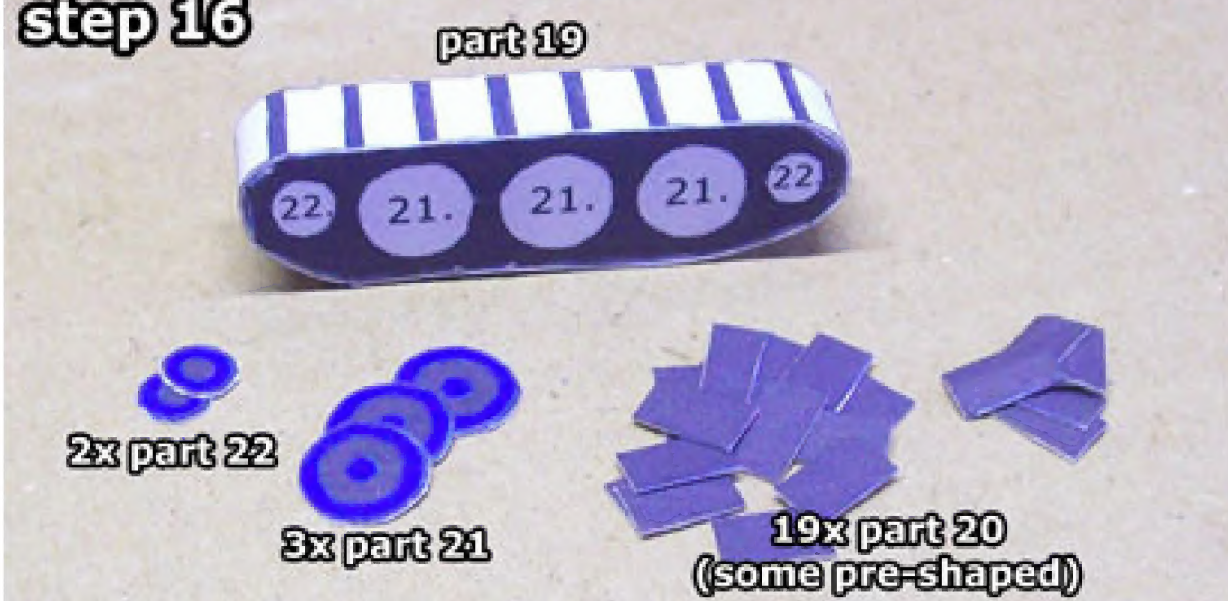

step 7

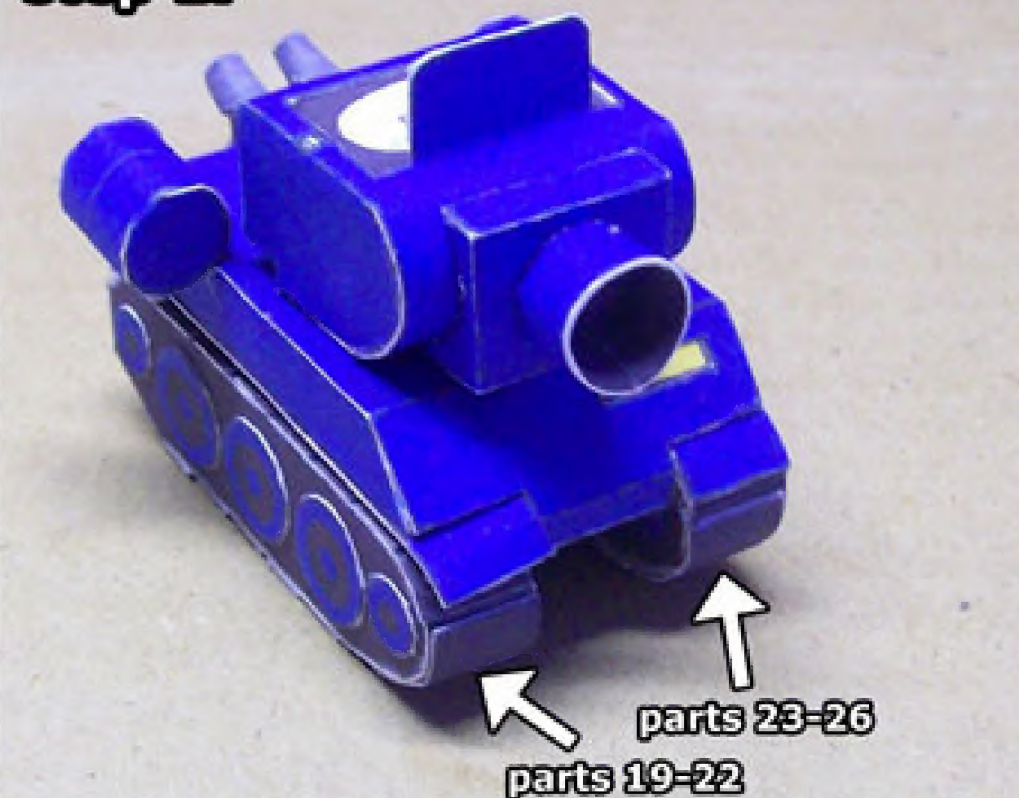

step 16

Glue together part 19, and cut out parts 20-22 to glue to part 19 (it helps to pre-shape some parts 20 for the curved parts of part 19).

step 17

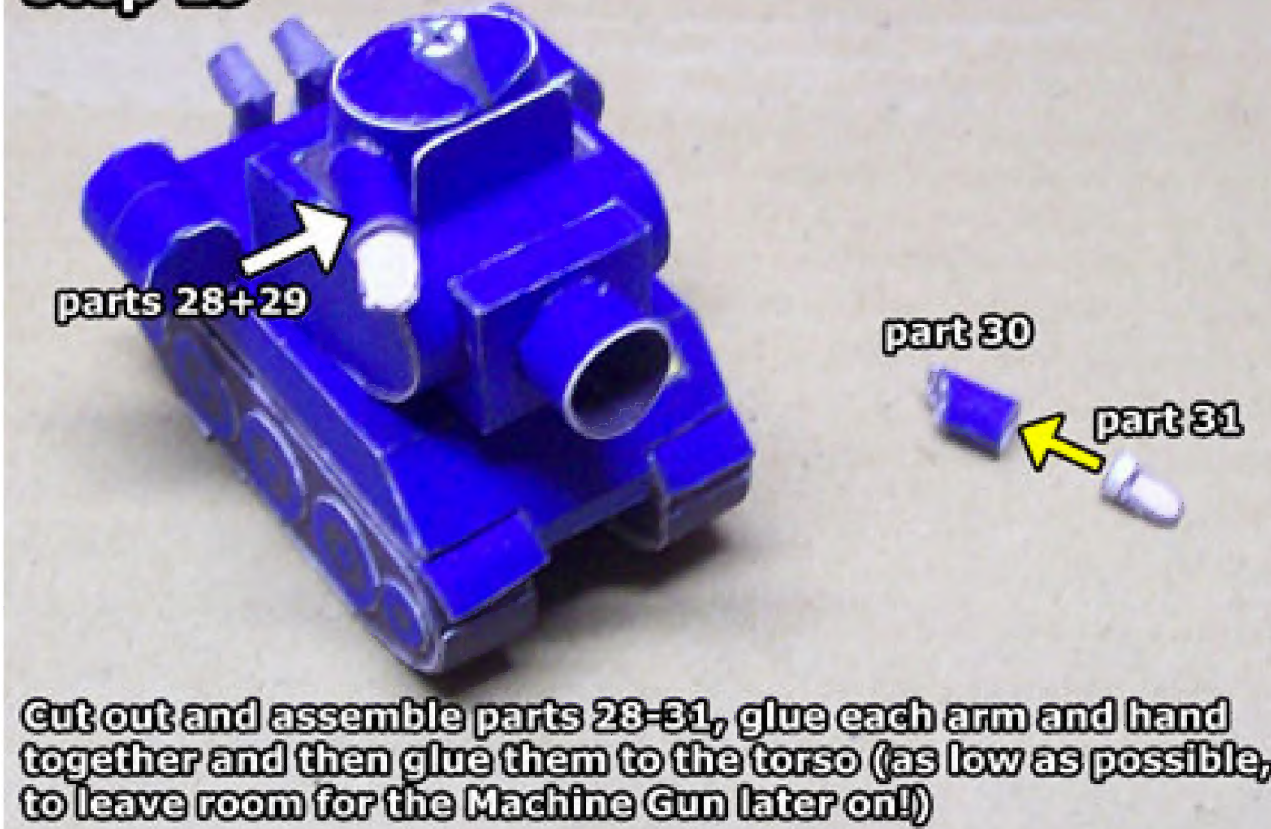

After glueing parts 20-22 to part 19, glue part 19 underneath the tank as shown here, and then to the same for parts 23-26 on the other side.

step 18

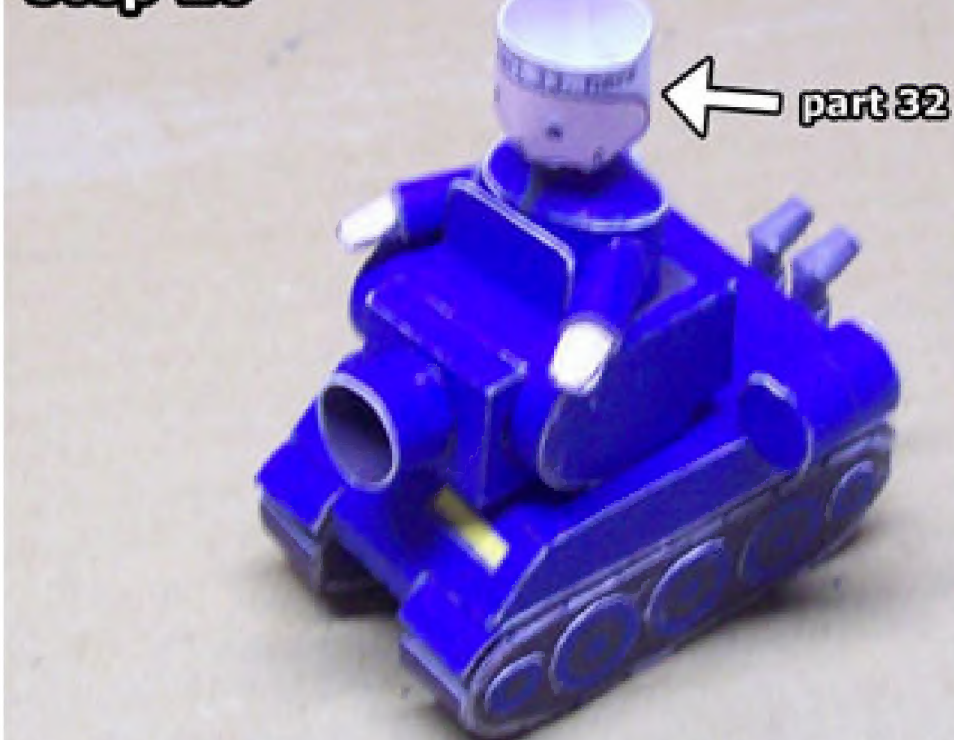

Cut out and assemble part 27 and glue it on top of the tank.

step 19

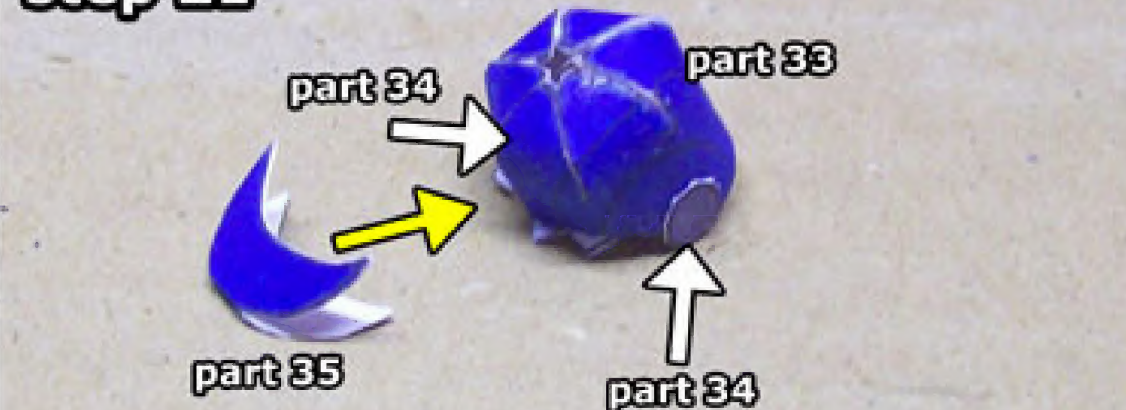

Cut out and assemble parts 28-31, glue each arm and hand together and then glue them to the torso (as low as possible, to leave room for the Machine Gun later on!)

step 20

Take your time to assemble part 32 (I found it easiest to pre-shape the "flaps" and then glue them together one by one until you can glue the two ends together) and then glue it on top of the torso.

step 21

Take your time to glue together part 33 the same way as the head (one "flap at a time"), then glue parts 34 on the sides, and then "sandwich" the small glueing tabs at the front between part 35.

step 22

Glue the helmet over the soldier's head.

step 23

Assemble part 36 and roll up parts 37 and 38 as tight as possible, and then glue them together to form the Machine Gun.

step 24

parts 36-38

**Blue Moon
Tank**

Glue the Machine Gun on top of the turret, just behind the right arm of the little soldier.

Thank you for building a Ninjatoes' papercraft model!
